

# Yuval Amit

Email: [yamit@umd.edu](mailto:yamit@umd.edu)

Website: [yuvalamit2.github.io](https://yuvalamit2.github.io)

## Education

---

**University of Maryland, College Park (UMD)** ..... Aug 2023 – May 2027  
B.S. in Mathematics, Minor in Computer Science (expected May 2027)

## Research Experience

---

**SMALL REU, Williams College** ..... Summer 2026  
Advisor: Steven J. Miller  
**Undergraduate Research, UMD** ..... Summer 2025  
Advisors: Foivos Chnaras, Larry Washington

## Papers

---

All joint with Steven J. Miller and collaborators.

*Product and Quotient Set Dominance in Finite Groups* ..... In preparation  
*Breaking Universality in the Lower Order Terms in the 1-Level and 2-Level Density of Holomorphic Cusp Newforms* ..... In preparation  
*The Fourier Ratio of Elliptic, Hyperelliptic, and L-Function Families* ..... In preparation  
*Random Fibonacci Tilings* ..... In preparation

## Reading Projects and Seminars

---

**UMD Modular Forms and Elliptic Curves Seminar** ..... Fall 2026  
Text: *Introduction to Elliptic Curves and Modular Forms* (Koblitz)  
**Algebraic Geometry (Milne)** ..... Fall 2026  
Advisor: Harry Tamvakis  
**Algebraic Number Theory and Fermat's Last Theorem (Stewart and Tall)** ..... Spring 2026  
Advisor: Larry Washington  
**Primes of the Form  $x^2 + ny^2$  (Cox)** ..... Fall 2025  
Advisor: Foivos Chnaras  
**Trees (Serre)** ..... Fall 2024 – Spring 2025  
Advisor: Roohollah Ebrahimian  
**Topology of Numbers (Hatcher)** ..... Spring 2024  
Advisor: Connor Lockhart

## Awards

---

Dan Shanks Award, UMD Department of Mathematics ..... 2026  
Aziz Mathematics Scholarship, UMD Department of Mathematics ..... 2025  
President's Scholarship, University of Maryland ..... 2023  
Most Promising Young Scientist, Synopsys Science Championship ..... 2023

## Talks

---

|                                                                      |          |
|----------------------------------------------------------------------|----------|
| <i>Ranks and Moments of (Hyper)elliptic Curve Families</i>           | Jul 2026 |
| Yale Undergraduate Conference                                        |          |
| <i>Weighted MPTQ Sums in Finite Groups</i>                           | Jul 2026 |
| Combinatorial and Additive Number Theory (CANT)                      |          |
| <i>Random Fibonacci Tilings</i>                                      | Jul 2026 |
| International Conference on Fibonacci Numbers and Their Applications |          |
| <i>Genus Theory and Primes of the Form <math>x^2 + ny^2</math></i>   | Nov 2025 |
| UMD Student Algebra-Number Theory                                    |          |
| <i>An Introduction to the Arithmetic of Elliptic Curves</i>          | Nov 2025 |
| Advanced Number Theory (Course)                                      |          |
| <i>Exploring Continued Fractions With Quadratic Forms</i>            | May 2024 |
| UMD DRP Lectures                                                     |          |

## Service

---

### Conferences and Seminars

|                                                                                         |           |
|-----------------------------------------------------------------------------------------|-----------|
| Co-organizer, UMD Lean Seminar                                                          | Fall 2026 |
| Session organizer, International Conference on Fibonacci Numbers and Their Applications | Jul 2026  |

### Journals

|                                         |             |
|-----------------------------------------|-------------|
| Referee, <i>The Fibonacci Quarterly</i> | Summer 2026 |
|-----------------------------------------|-------------|

## Skills

---

*Programming:* Java, C  
*Math software:* Lean, SageMath  
*Typesetting:*  $\LaTeX$  ([github.com/YuvalAmit2/LaTeX-Template](https://github.com/YuvalAmit2/LaTeX-Template))  
*Languages:* Hebrew (conversational)
